DATABASE:

IBM cloud is a vast data storage method . The IBM®Cloudant distributed database has a 99.99% SLA and is completely managed. It is designed for heavy workloads and quickly expanding online and mobile apps. For hybrid or multicloud systems, Cloudant's API and replication protocols are compatible with Apache CouchDB and it elastically scales throughput and storage. We have use cloudant database with json for creating databases which were required for storing information in ecommerce website by using ibm cloud.three databases are created for storing information.Database1 is used for storing product details,database2 is used for storing customer details and database3 is used for sale and order
